

Central Lyon Volleyball

Central Lyon Volleyball Mission Statement:

To develop hard working individuals who are positive role models on and off the court, as well as; pushing student athletes to reach their fullest potential. It is our mission to instill a strong work ethic, discipline, leadership, and a desire to play the game of volleyball, competitiveness, and other life lessons along the way.

Central Lyon Team Philosophy:

Once practice is underway, coaches will evaluate each athlete's skill level. Athletes may be moved within freshman, Jr. Varsity and Varsity levels for them to be successful—this is important for confidence and for skill improvement. We have many athletes who work above and beyond the minimum to better themselves. We're hoping our players really push each other to become better athletes, and to continue to develop our volleyball program.

Coaches will attempt, whenever possible, to provide playing time for every athlete on the roster. But these opportunities cannot be guaranteed. To balance squads, players could be moving up or down throughout the season, flexibility from all athletes and parents is an integral component in each team's success.

Coach Schar's Philosophy

Varsity Level

As your varsity coach, my philosophy is to first and foremost provide my athletes with a safe and competitive playing environment that allows each varsity player to reach their fullest potential. I will be firm and consistent and treat all athletes fairly. I will expect my athletes to work hard, strive to improve, be a team player and a coachable athlete. At the varsity level, I will attempt, whenever possible to provide playing time for every varsity athlete on the roster. But these opportunities cannot be guaranteed. And when they do not occur, my perception of when they should occur may not match with yours. Please respect this. I will work for my athletes to understand above all, playing-time decisions at the varsity level come from my obligation to produce a team that will defeat our opponents. I will always put the players on the floor who I think have the best chance to win the match.
